AutoCAD

History AutoCAD was originally called "AutoCAD Desk Software", a modification of Daniel de Koning's original AutoLISP (AutoLISP Software System) code. When Daniel de Koning and Autodesk were initially partnering with Overbeck and Deering to create AutoCAD, Autodesk bought the rights to the code and the name Autodesk AutoLISP for their own product, and the name was simply changed from AutoCAD to AutoDesk AutoCAD. Autodesk AutoCAD (originally AutoDesk AutoLISP) was introduced in 1984. The first edition of AutoDesk AutoCAD was a dual-window application, where user commands were entered through a command line, and the user's drawing window was the other. The editor and command-line window were in a single window, and side-by-side view of the command-line window and the drawing window. In 1985, the command line was moved to the left-hand side of the drawing window, and side-by-side view was implemented in AutoCAD LT for the first time. AutoCAD was originally developed in Turbo Pascal. AutoCAD was the first popular software to use the DXF file format. It was the foundation of AutoCAD Architecture, AutoCAD Electrical, and AutoCAD Civil 3D. District Court of Appeal of Florida, First District. November 1, 2004. Rehearing Denied December 20, 2004. *1226 Michael Ufferman, Tallahassee, for Appellant. Charlie Crist, Attorney General, and Jennifer J. Moore, Assistant Attorney General, Tallahassee, for Appellee. PER CURIAM. This is an appeal of an order denying appellant's motion for postconviction relief, filed pursuant to Florida Rule of Criminal Procedure 3.850, in which he sought to challenge his convictions and sentences for first degree murder, robbery, burglary of a dwelling, possession of a firearm during the commission of a felony, and conspiracy to commit robbery. Appellant sought to raise two grounds in his rule 3.850 motion: (1) that the trial court erred in failing to grant a mistrial after a state witness made reference to his post-arrest silence, and (2) that the trial court erred in allowing certain jury instructions. In denying the motion, the trial court conducted an evidentiary hearing and denied relief on both claims. We affirm the order as to appellant's claim that the trial court erred in denying a mistrial. As to appellant's claim that the trial court erred in giving certain jury instructions, the postconviction court also conducted an evidentiary hearing, and our independent review of the record and the law indicates that the court's
